Peoria	7.0%	6.2%	0.8
Rockford	7.2%	6.9%	0.3
Springfield	5.4%	5.3%	0.1
St. Louis (IL-Section)	6.1%	6.1%	0.0
Illinois Statewide	5.9%	5.8%	0.1

* Data subject to revision.

CHICAGO—Illinois jobs decreased in six metropolitan areas and unemployment rates increased in eleven regions, according to data released today by the Illinois Department of Employment Security (IDES) and the U.S. Bureau of Labor Statistics (BLS). The unemployment rate remained the same in three areas and one metro area saw no change in non farm jobs. The not seasonally adjusted data compares over-the-year change from December 2015 with December 2014.

Illinois businesses lost jobs in areas including the Quad Cities (-2.4 percent, -4,500), Decatur (-1.8 percent, -900), Carbondale-Marion (-1.3 percent, -700), and Lake-Kenosha (-1.3 percent, -5,100). Illinois businesses added jobs in seven metros including Elgin (+1.6 percent, +4,100), Champaign-Urbana (+0.8 percent, +900), Chicago-Naperville-Arlington Heights Metro Division (+0.7 percent or +26,800), and Danville (+0.7 percent, +200). Two industries recorded job growth: Education and Health Services (nine sectors) and Leisure and Hospitality (eight sectors).

“Illinois took another hit on jobs and many metro areas continue to absorb these hits,” said IDES Director Jeff Mays. “Since the

previous jobs peak in 2007, only three out of fourteen metro areas have regained the jobs lost during the recession.”

The not seasonally adjusted Illinois rate was 5.9 percent in December 2015 and stood at 12.2 percent at its peak in this economic cycle in January 2010. Nationally, the not seasonally adjusted unemployment rate was 4.8 percent in December and 10.6 percent in January 2010 at its peak. The unemployment rate identifies those who are out of work and looking for work, and is not tied to collecting unemployment insurance benefits.

Total Nonfarm Jobs (Not Seasonally Adjusted) – December 2015

Metropolitan Area	December 2015*	December 2014**	Over-the-Year Change
Bloomington MSA	95,100	95,000	100

South Central Illinois Highlights

Unemployment increased throughout South Central Illinois when compared with one year ago. Seasonal layoffs influenced the labor market conditions at the end of 2015. The data is not seasonally adjusted.

Over the year, employment advances were reported in Retail Trade and Transportation in South Central Illinois. Employment in Health Care Services continued to expand. Payroll gains occurred in Wholesale Trade and Professional-Business Services. Seasonal layoffs in Construction began in November 2015. Payroll losses were reported in Financial Services and Information during 2015. Government and Mining employment steadily declined during the past year.

Employment opportunities were advertised in Transportation, Health Care, and Sales at the end of 2015. Job openings also were reported in Office and Administrative Support, Management, Food Preparation, and Production occupations. Workers were needed in Computer Services, Engineering, Food Services, and Installation, Maintenance, and Repair occupations in December 2015.

The unemployment rate identifies those who are out of work and seeking employment. A person who exhausts benefits, or is ineligible, still will be reflected in the unemployment rate if they actively seek work.

Note:

- Monthly 2014 unemployment rates and total non-farm jobs for Illinois metro areas were revised in February 2015, as required by the U.S. Dept. of Labor, Bureau of Labor Statistics (BLS). Comments and tables distributed for prior metro area news releases should be discarded as any records or historical analysis previously cited may no longer be valid.
